

# High School Facilities update July 15, 2009

Phase I of the High School sometime in September or October. At that time, we will move all of the students into the new classroom wing, classrooms that will remain, and several portable classrooms while we demolish the south part of the high school and begin building the two classroom wings for Phase II.

Even though we won't be finished with Phase I until after school starts, we should be finished with just the cafeteria and commons area by the time school begins so that we can feed Jr. High and High School students in the cafeteria the first day of school.
