

Facilities Update

The demolition of the south part of the existing High School is almost complete. This Monday, January 11, High School students will access the science classrooms by going out the west entrance to the commons area and the entrance by the band hall and entering through the temporary door on the south side of the science classrooms. The construction crew has built a sidewalk and fences to protect students from the construction site. Demolition should be completed by next week, and construction should also begin on the two south classroom wings next week. The two classroom wings should be completed by the start of school next year.

The pictures show the installation of the glass in the trophy cases in the new commons area of the High School.
