

# Facility Update 2/3/09

Here are pictures of the High School and DeShazo Elementary construction progress. The construction crews were on the job Saturday at the High School pouring the concrete slab in the area of the gym locker rooms. Just to the left of the picture is the tall north wall of the gym.

The picture of DeShazo shows a couple of the air conditioning units on top of the building. The construction crews should begin "taping and bedding" the interior walls this week.

We are still pretty much on schedule and in budget. We should complete the DeShazo Elementary addition of the five classrooms by the start of school next year. We should complete Phase I of the High School by next October or November (maybe). Phase I includes the gym, math classroom wing, high school offices, entrance, east parking lot and drive through, and library.
